

## Nedo Laser mEssfix-S

Nedo Laser mEssfix-S is a robust telescopic measuring stick for determining differences in height with a rotating laser and a laser receiver. Perfect for use in excavation jobs, levelling and civil engineering projects.

Simply attach the laser receiver to the Laser mEssfix-S and position the detector in the laser plane by means of telescopic sections. The height of the laser plane can be read off from the analogue display.

Quick, simple and precise.

The universal adapter allows to attach all kinds of laser receivers to the Laser mEssfix-S. In order to avoid unintentional changes in the extended length, the telescopes are equipped with a clamping screw to ensure a secure hold.

The vertical position is maintained thanks to the circular bubble.

### Features:

- Robust telescopic measuring stick with easy-to-read analogue display
- Universal adapter to accommodate all types of laser receivers
- Circular bubble to ensure an exact alignment
- Anodised telescopes, can be fixed with clamping screws
- Easy to handle
- Reliable levelling system for all rotating lasers with receiver
- Supplied with case as a standard
- Made in Switzerland

### Nedo Laser mEssfix-S

Ref.-No.	Features	Min. length	Max. length	Incl. case
F 687 511	with universal adapter	1.37 m	5.17 m	yes
F 887 511	with universal adapter	1.70 m	6.83 m	yes
